STOCK and SON'S SOIL-PAN SERVICE-BOX.

The object of this contrivance is to facilitate the introduction of sanitary improvements into the dwellings of the working classes, by the adoption of such an arrangement of cheap soil-pan apparatus as will enable the "constant supply system" of water service to be made available for the removal of the refuse, by preventing the enormous waste of water in places of this description, to which water companies now so strongly and so properly object. By the use of the service-box an ample supply of water is obtained, without the possibility of its being wasted by propping the valve, weighting the handle, or by other means. It is so constructed that, so long as the discharge-tap remains open, a further supply cannot enter the service-box from the main.—Drawings and descriptions may be obtained from STOCK and SON, manufacturers of plumbers' brass-work, gas fittings, and church furniture, in iron and brass, Temple-street, Birmingham.

JENNINGS'S INDIA-RUBBER TUBE OF WATER-LOCKS renders the OLD PAN and VALVE CLOSET UNNECESSARY; their ACTION is PERFECT; their CONSTRUCTION SIMPLE, they are VERY DURABLE, and SAVE FIFTY PER CENT. IN PLUMBERS' WORK.
For these and JENNINGS'S other inventions in the Sanitary Class 38, Great Exhibition, and for further particulars and descriptive drawings, apply to or JENNINGS, 36, Great Charlotte-street, Blackfriars-road.
